Week se werksinkels wys wiskunde en wetenskap is pret

Bespreek sommer nou al plek vir jou skool om 'n praktiese werksinkel of twee by die heel eerste [Standard Bank Matie Wiskunde-en-Wetenskapsweek](#) by te woon. Dit word gratis van 19 tot 23 Mei op die Stellenbosch kampus gehou vir Graad 10 tot 12-leerders met Fisiese Wetenskappe, Wiskunde of Lewenswetenskappe as vak.

Dit word aangebied deur die Universiteit Stellenbosch se Sentrum vir Voornemende Studente, in samewerking met die Fakulteite Ingenieurswese, Natuurwetenskappe, Gesondheidswetenskappe en Agriwetenskappe, asook TRAC, iThemba LABS en die MTN ScienCentre.

Die praktiese werksinkels, demonstrasies, interaktiewe eksperimente of vertonings oor wiskunde en die wetenskappe sal dit vir jou makliker maak om abstrakte teoretiese konsepte te visualiseer en te begryp.

Daarby sal jy die kans kry om eerstehands sommer baie pret te hê terwyl jy hope leer oor wiskunde, tegnologie en wetenskap.

Met praktiese sessies oor die toets van bloed en DNA, lasers, navorsing oor MIV/vigs, die gebruik van hout as boumateriaal, die ooreenkoms tussen musiek en wetenskap, onderwatergeneeskunde en 3D-rekenaarspeletjieprogrammering, kan die week nie anders as om interessant te wees nie! Jy kan selfs jou eie elektriese motor help bou!

Boonop is daar ook heelwat boeiende wiskunde-werksinkels en praatjies en besprekings oor elektrostatika, finansiële wiskunde, arbeidsterapie, dieetkunde, fisioterapie en natuurbewaring om van te kies.

Daar sal ook die geleentheid wees om inligtingsessies oor die Universiteit Stellenbosch by te woon, beroepsassessering te ontvang, kampoere te onderneem en rolmodelle van die Universiteit te ontmoet.

Bywoning is gratis, maar bespreking is noodsaaklik!

Kontak: Mathew by maties@sun.ac.za of (021) 808 2923 of Lorna Bartlett by lbar@sun.ac.za of (021) 808 2370.

Applying to Stellenbosch University: A step-by-step guide << to top

If you are unsure about how to apply, you can follow our easy step-by-step guide below. You'll see the procedure is quite simple.

Step 1: OBTAIN INFORMATION

Obtain an application form and all relevant information brochures. You can get all the information on studying at Stellenbosch at www.maties.com.

Step 2: APPLY

If you are a Grade 12 learner, you apply with your Grade 11 final examination results on the basis of which the University considers you for provisional acceptance. If you have already written your Grade 12 final examination, you apply with your Gr 12 final examination results. You can also apply online at www.maties.com.

Please note that the closing dates for applications are:

- 31st of May for Health Sciences
- 30th of June for other selection programmes (including: BAcc, all courses in our Faculty of Law, BA in Visual Arts, Drama & Theatre Sciences, BMus (Music)) and also for accommodation in a residence
- 30th of September for non-selection courses

Step 3: WRITE THE ACCESS TESTS

After application, you will receive a student number. You will also receive information on Access Tests. It is compulsory for all applicants to write the ATs. Just note that if you are applying for programmes in the Health Sciences, you will write the Health Sciences Placement test. You write the ATs in the course of your matriculation year or the year preceding your studies.

You can reserve a place to write the ATs by either faxing your completed booking form to 021 886 4365 or e-mailing it to tgt@sun.ac.za. The booking form will be sent to you, but it is also available on www.maties.com.

Step 4: CALCULATE YOUR SCHOOL AND ACCESS TEST RESULTS IN A 60:40 RATIO

Your average AT results will be sent to you as soon as it becomes available. You can then calculate what your NSC average should be in the 40:60 ratio to ensure your admittance. You will also be able to obtain your AT average at www.maties.com. To register, you must achieve an average of at least 50% for both the ATs and the NSC together in a ratio of 40:60 and comply with the faculty and programme-specific requirements.

For more information, please contact the [Centre for Prospective Students](#) on 021 808 4027 or by e-mailing maties@sun.ac.za.

Opedag vir voornemende ingenieurs << na bo

Die Fakulteit Ingenieurswese se Opedag vind plaas op Saterdag 19 April 2008 van 10:00 tot 16:00 in Stellenbosch. Toegang is gratis.

Daar sal hope praatjies en aanbiedings wees wat jou behoorlik sal inspireer om 'n ingenieur te word!

Vir meer inligting, kontak August Engelbrecht by (021) 808 3614 of engineer@sun.ac.za.

Onthou ook dat die Fakulteit se gewilde [Ingenieurswese Winterweek](#) van 29 Junie tot 4 Julie 2008 plaasvind. Dit bied Graad 11 en 12-leerders wat in ingenieurswese as loopbaan belangstel, 'n geleentheid om die ingenieursprofessie van nader te bekyk en sodoende 'n ingeligte beroepskeuse te kan maak.

Is jy onseker oor wat jy moet studeer? <<na bo**Die Universiteit se loopbaanvoorligtingsdiens is hier om te help!**

Die Universiteit Stellenbosch bied 'n loopbaanvoorligtingsdiens aan wat jou kan help met jou loopbaankeuse. As jy belangstel om 'n psigometriese assessering (aanleg-, belangstellings- en persoonlikheidsassessering) af te lê met 'n individuele terugvoersessie deur 'n sielkundige agterna, skakel gerus die Sentrum vir Voornemende Studente by (021) 808 4709.

Ons sielkundiges besoek tydens die tweede kwartaal die volgende skole om bogenoemde diens daar te lewer: Hoërskool De Kuilen, Girls' High, Hoërskool Tygerberg, Hoërskool DF Malan, Hoërskool Stellenbosch. Skakel gerus jou voorligtingonderwyser of die Sentrum vir Voornemende Studente vir meer besonderhede

Boost your brain for study success << to top

The "LearnWell4Life for study success" DVD can help you get a grip on the exams, can provide you with valuable study tips and can help you master your tertiary education career successfully.

The DVD was developed by a team of experts at Stellenbosch University with the needs of today's learners and students in mind.

It is available in English, Afrikaans and isiXhosa at a price of R250 per DVD.

The DVD includes valuable tips on motivation, enhancing your class experience, problem-solving skills, self study skills and time management skills, and helping you deal better with stress and the exams.

Order your copy from Mariëtte Hanekom at (021) 808 4585 or e-mail mhanekom@sun.ac.za. You can also visit www.equipu4.com for more information.

Bonus: Two experienced LearnWell facilitators will present the very popular "LearnWell Study and Thinking" workshop on 5, 12 and 19 April, and 10 May in Stellenbosch. The course is suitable for high-school learners from Grade 10 up to university level. Contact Marita Snyman at (021) 808 4563 or learning@sun.ac.za.

Maties Natuurwetenskappe Winterweek << na bo

Ons gewilde Maties Natuurwetenskappe Winterweek word van 29 Junie tot 3 Julie 2008 gehou. Leerders wat belangstel om 'n beroep in die Natuurwetenskappe te volg, kry gedurende dié week die kans om self meer uit te vind van die verskillende programme, vakdissiplines en verwante beroepsmoontlikhede.

Dit vind plaas onder beskerming van die Fakulteit Natuurwetenskappe in samewerking met die Natuurwetenskappe Studentekomitee, en is ideaal vir leerders in Graad 11 en 12. Die koste is R875 en leerders sal in 'n universiteitskoshuis tuisgaan. Aansoeke sluit op 16 Mei 2008.

Vir meer inligting en aansoekvorms, besoek die [Natuurwetenskappe webblad](#) of kontak Mariëtta van den Worm by mvdworm@sun.ac.za of (021) 808 3760.

Consider a career as an animal scientist << to top

Stellenbosch University does not offer a degree in veterinary science. If you'd like to work with animals, you could consider our BSc(Agric) Animal Science. As an animal scientist, you will be involved in the breeding of top quality animals.

This study programme integrates knowledge about the ecology, biochemistry, physiology, nutrition, breeding, production and quality of meat products and the management of animal production systems.

Prospective students can choose between six study areas. Recent changes in the course means that you have the option to follow an Animal Science module from your first year onwards, or choose an additional Microbiology module instead of one of the Physiology modules.

This is a four-year degree. The general minimum requirements of the SU, as well as the following requirements, apply:

- Afrikaans or English (Home Language or First Additional Language) 4
- Mathematics 4
- Physical Sciences 4 OR
- Physical Sciences 3 and Life Sciences 4

Visit the website of the [Department of Animal Sciences](#) for more information.
